

Feet - Incision and Drainage

Infected Foot

Photos courtesy of: Dr. Lee Rogers

I & D

An incision and drainage procedure was performed to remove infected tissue.

TMA and DermaClose application

A TMA and DermaClose application was followed by application of NPWT.

Day 4

On day four the wound was fully approximated, the DermaClose removed and the wound sutured closed without complication.

Feet - Incision and Drainage cont.

healed 3 weeks

At 3 weeks this wound went on to healing
